45%
Of data breaches involve cloud assets

$4,75 mln
Average cost of data breach in the cloud

29%
Organizations have visibility into all cloud environments

41%
Organizations had cloud-related security incident in past 12 months

Don't:

1 Assume it is secure by default

2 Delegate security to DevOps

3 Rely on 3rd party

4 Skip the asset management

5 Make security one-time activity

6 Wait for better time

Do:

1 Start today

2 Define clear responsibilities

3 Start small, think big
